

StarterPac

Professional Installation Services

Professional Installation

METTLER TOLEDO Service offers a complete installation by factory-trained technicians, ensuring your equipment performs optimally from the moment it is installed.

Setup and Configuration

Your equipment is setup and configured according to your specific processes, environment, and requirements, allowing you to begin operations quickly.

Training for Ease-of-Use

Our initial training and familiarization ensures that those operating, servicing, and interacting with your equipment understand how it functions from day one.

Certified Documentation

Each installation is clearly documented by certified service technicians. The documentation includes installation details and a recommended service plan to ensure your systems continue performing optimally over time.

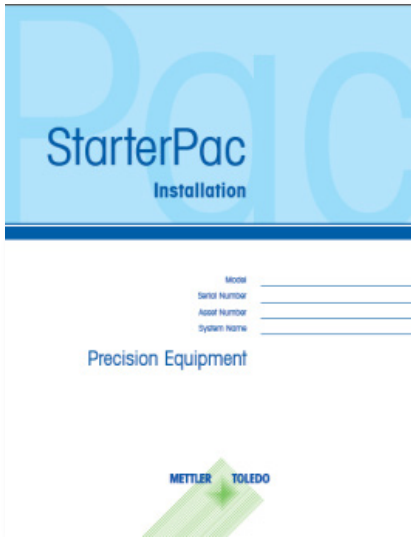

Peace-of-Mind from Day One Quick, Expert Installation

METTLER TOLEDO StartPac is an installation package that ensures your equipment runs optimally from day one.

Your Benefits:

- Installation by factory-trained, expert technicians
- Equipment is setup and configured to meet specific operational requirements
- Training is designed to make all users feel comfortable and efficient when using the equipment
- Complete installation documentation including system setup and recommended service plan

Installation Pacs for Truck Scales

Equipment Installation	Installation using standardized procedures and operational checks.
Standard System Configuration	Configures device settings to meet your basic application requirements.
Overview Training	Provides operators and maintenance personnel with an operational and maintenance overview.
Documented Installation	Documented installation for low- or unregulated environments.
Calibration and Certification	A variety of procedures and certificates meeting quality system, industry, and regulatory requirements.

Care Packages

METTLER TOLEDO Service provides you differentiated care packages designed to your needs. Depending on your equipment usage and environment we will also determine the optimal frequency of your maintenance and calibration service, including preferred intervention service and technical hotline access.
